

## Jr. Technical Service Engineer

**Company:** PUROLITE GLOBAL SALES Limited  
**Location:** Milan - Italy

For the Italian Sales Office based in Milan, Purolite is seeking an enthusiastic Technical Service Engineer.

After an appropriate technical training, under the supervision of the Technical Manager and according to the inputs of the Sales Manager, he/she will provide technical support to consolidated, new or potential customers in Italy and in other foreign countries under the responsibility of the Italian office. His/her main responsibilities will include:

- recommending the suitable Purolite products for customer's applications
- sizing and calculating the relevant ion exchange plants
- suggesting the appropriate operating conditions
- troubleshooting

Moreover the successful candidate will:

- promote new products and their technical advantages
- technically support agents and distributors
- interact with Sales people, R&D, Central Technical Service, Production and Marketing departments of the Purolite Company

The candidate must have a high educational level in chemistry or chemical engineering, must be Italian mother tongue and fluent in English, needs to have good communication skills to establish excellent relationships with customers.

Some experience with ion exchange resins and/or water treatment will be much appreciated. The candidate will have to live in Milan area, only little travelling required.

The role will allow the candidate to become a key interface between the Company and the most qualified players in the industrial, chemical and pharma industry needing ion exchange resins for water and process solutions treatment.
