PUROLITE RECEIVES ISO 9001:2000 CERTIFICATION
FOR U.S. MANUFACTURING FACILITY

BALA CYNWYD, PA – December 22, 2008 – Purolite Corporation, the preferred global supplier of ion exchange resins, has received ISO 9001:2000 certification for its manufacturing plant in Philadelphia, as well as its corporate offices in Bala Cynwyd, PA.

“As the leading manufacturer in North America of ion exchange resins products for industrial, commercial and municipal water needs, we continue to meet the rigorous quality standards demanded for ISO 9001:2000 certification,” says Don Brodie, Vice President of Operations at Purolite. “We are dedicated to anticipating the needs of our global customers and exceeding their expectations with new technology, products, and applications.”

Purolite is committed to developing products that help its customers manage their environmental challenges with respect to water, energy and chemical consumption. The company is a prime manufacturer and distributor of products which are widely used in: pharmaceutical production; semiconductors production; potable water; chemical and refining industries; catalysis; the food and beverage industry; metals extraction; metals finishing; electroplating; nuclear power generation; chromatographic separation and adsorbent chemistries.

Purolite Corporation was founded in 1981 and is a leading manufacturer of ion exchange, catalyst, adsorbent and specialty resins and the only company to focus exclusively on this market. Headquartered in Bala Cynwyd, PA, the company has ISO-9000:2001 certified sales offices in more than 30 countries, as well as manufacturing and R&D facilities in the USA, China and Romania. Purolite also has a dedicated central research and development facility in the United Kingdom.
