PUROLITE ADJUSTS PRICE FOR  
ION EXCHANGE, CATALYST, ADSORBENT AND SPECIALTY RESINS

*Sustained High Raw Materials and Operating Costs Forces Increase*

Bala Cynwyd, PA – March 9th, 2007 -- Due to increasing high costs for raw materials and energy, Purolite, the largest privately held ion exchange, catalyst, adsorbent and specialty resin manufacturer, will increase its prices worldwide for all products. The price increases are effective April 1st, 2007. Prices will increase an average of 5% percent, depending on the product line.

“ In order to maintain the high level of quality and services our customers expect, we are forced to pass part of the raw material and operating cost increases we are incurring,” said Mr. Stefan Brodie, President and CEO.

Purolite Corporation was founded in 1981 and is a leading manufacturer of ion exchange, catalyst, adsorbent and specialty resins and the only company to focus exclusively on this market. Headquartered in Bala Cynwyd, PA, the company has ISO-9000:2001 certified sales offices in more than 30 countries as well as manufacturing and R&D facilities in the USA, China and Romania. Purolite also has a dedicated central research and development facility in the United Kingdom.
