PUROLITE INCREASES PRICE FOR
ION EXCHANGE, CATALYST, ADSORBENT AND SPECIALTY RESINS

Continued High Raw Materials and Operating Costs Forces Increase

Bala Cynwyd, PA – July 9th, 2007 -- Due to sustained high costs for raw materials, transportation and energy, Purolite, the largest privately held ion exchange, catalyst, adsorbent and specialty resin manufacturer, will increase its prices worldwide for all products and services. The price increases are effective August 1st, 2007. Prices will increase an average of 5% percent.

“ Purolite has made great strides in recent months to reduce overall operating costs and in improving product and service quality. Continued cost escalation, however, forces us to pass part of the raw material and operating cost increases we are incurring, to our customers” said Mr. Stefan Brodie, President and CEO.

Purolite Corporation was founded in 1981 and is a leading manufacturer of ion exchange, catalyst, adsorbent and specialty resins and the only company to focus exclusively on this market. Headquartered in Bala Cynwyd, PA, the company has ISO-9000:2001 certified sales offices in more than 30 countries as well as manufacturing and R&D facilities in the USA, China and Romania.

PuroLite also has a dedicated central research and development facility in the United Kingdom.

PuroLite has been a member of the Water Quality Association since 1982 and manufactures more than 400 different ion-exchange-resins, catalysts and adsorbents. It produces resins for the sweetener/sugar, beverage, bottled, municipal water, ultra-pure water, petrochemical refining, mining, bio-fuel, nuclear power, pharmaceutical, metals finishing, microelectronics, food and other industries.
