PUROLITE RAISES PRICES FOR  
ION EXCHANGE, CATALYST, ADSORBENT AND SPECIALTY RESINS

*Substantial increase in costs for raw materials, energy, & freight*

Bala Cynwyd, PA – October 31st, 2007 – Due to continued high costs for raw materials, utilities and freight, Purolite, the largest privately held ion exchange, catalyst, adsorbent and specialty resin manufacturer, will increase its prices worldwide for all products. The price increases are effective December 1, 2007. The price increases will range from 10 to 15 percent or as contracts allow.

“The continuing rise in raw materials, energy and freight force us to increase prices,” said Mr. Stefan Brodie, President and CEO. “We are working very hard to keep our overall costs down. However, in order to continue to provide our customers with the products and services they deserve, we must take this action.”

Purolite Corporation was founded in 1981 and is a leading manufacturer of ion exchange, catalyst, adsorbent and specialty resins and the only company to focus exclusively on this market. Headquartered in Bala Cynwyd, PA, the company has ISO-9000:2001 certified sales offices in more than 30 countries as well as manufacturing and R&D facilities in the USA, China and Romania.

PuroLite also has a dedicated central research and development facility in the United Kingdom.

PuroLite has been a member of the Water Quality Association since 1982 and manufactures more than 400 different ion-exchange-resins, catalysts and adsorbents. It produces resins for the sweetener/sugar, beverage, bottled, municipal water, ultra-pure water, petrochemical refining, mining, bio-fuel, nuclear power, pharmaceutical, metals finishing, microelectronics, food and other industries.
